

SPN800

Belt resurfacer

The SPN800 belt surfer is the cheapest and most effective way to resurface engine parts, like intake and exhaust manifolds, cylinder heads, covers, pans and any flat surface.

It is the easiest machine of its kind to operate, thanks to the foot safety switch, and to maintain, thanks to the fast and easy belt replacement.

Moreover, it does not require any piece locking or regulation like in any other grinding operations.
